Lovable App – Personal Portfolio

Description:
Lovable is a personal portfolio application designed to showcase projects, skills, and achievements. It focuses on interactive design, smooth user experience, and a clean interface, providing a professional online presence.

Key Features:

- Portfolio showcase with project details and screenshots
- Responsive design for mobile and desktop
- Interactive elements and animations for enhanced engagement
- Contact form for potential clients or recruiters

Technologies Used:

- Frontend: HTML, CSS, JavaScript, Tailwind CSS
- Framework: ReactJS
- Optional: Animations with Framer Motion

Impact:
Provides a professional and visually appealing way to present personal work, making it easy for recruiters or collaborators to explore your projects.
